## schliesing Quality

Quality, safety and innovation: for more than 30 years we have been manufacturing high-quality wood chippers for professional uses in gardening and landscaping, for cities and communities, as well as for companies active in the fields of agriculture, forestry and tree care. All machines are produced at our company's registered office in Kempen on the Lower Rhine: 100% Made in Germany! Always true to our motto: Made by professionals for professionals!

#### PRECISION FOR PROFESSIONALS

- Best in quality, in design, manufacturing and service
- Selection of our suppliers based on the most stringent criteria
- Preservation of our know-how for the future by qualifying young people in our own factory
- Highest emphasis on work safety
   (e. g. SAFEchip and WhisperCut®)
- 100% Made in Germany

#### WHISPERCUT®

- Patented cutting system with V-shaped blade positions, proven in the field for many years
- Reduction of the sound pressure level by up to 30%
- Service life extension of the blades by up to 40%
- Safer, more uniform feeding characteristics as compared to conventional blade systems
- WhisperCut® optionally available for nearly all schliesing wood chipper models

#### **PARTNERSHIP AND SERVICE**

- European-wide dealer network for service, maintenance and repairs
- Frequent demonstrations of our machines as well as permanent training of our employees, dealers and suppliers
- Guaranteed spare parts' availability for a period of 10 years from date of purchase
- Prompt spare parts' delivery (standard parts ordered by 14:00 hours will be dispatched on the same day)
- Simple and optimised maintenance of the machines

#### LOW TOTAL COST OF OWNERSHIP

- Sturdy, high-quality machine design resulting in extremely little downtimes
- Long service life and intrinsic value of schliesing machines
- Simple, quick and safe replacement of blades and other wear
- Systems to reduce wear parts' consumption (blades in particular)
- Latest, optimised diesel engines

	13 cm
Feed width	200 mm
<b>Weight</b>	< 750 kg
Feed hopper	865 x 720 mm
Driver's licence class B	

schliesing wood chippers comply with the safety regulations of DIN EN 13525. The diesel engines installed exceed the exhaust emission standards of EU 97/68 / III A

- Low-priced entry-level model in proven schliesing quality
- Suitable for holders of driver's licence class B class BE is not required
- Small, lightweight and highly maneuverable

#### **ENGINE AND CHASSIS**

- 3-cylinder Kubota diesel engine with 14.7 kW (20 hp)
- Water-cooled
- Industrial freewheel clutch, automatically engaging between the engine and the chipping disk
- Power Control System incl. minutes counter (optional)
- Single-axle chassis (80 km/h) also available for 100 km/h
- Solid, walk-on sheet steel fenders
- Towing hitch with inertia brake and ball coupling
- Front jockey wheel and support leg at the rear
- Road lights in accordance with StVZO (shock-protected)
- TUEV expertise and ABE (general operation approval D, NL, F)
- Pneumatic tires 165/70 R13

#### MACHINE BODY / FEED HOPPER / DISCHARGE CHUTE

- Pivoting discharge chute with adjustable chip deflector (as per GS standard)
- Sound insulation of relevant machine parts (hood in particular)
- Feed hopper with flap as per CE standards, 1,500 mm feeding depth
- Change of colour optional

#### **CHIPPER UNIT**

- Infinitely variable, hydraulic chip size adjustment (5 25 mm)
- 2-blade chipping disk with fully adjustable blades. Possibility to resharpen multiple times for a long service life
- Enclosed cutting system for a quick, safe and exact blade change
- Horizontal anvil, reversible for a long service life
- Excellent protection against entangling at the main bearing of the chipping disk
- Chipping unit equipped with safety circuit conforming to EN 13525

#### **HYDRAULIC FEED**

- Separate hydraulic circuit
- Powerful feed rollers with hydraulic forced feeding and two separate oil motors
- Parallel-guided upper feed roller providing a uniform feeding (no wedging of the fed material)
- Optional: SAFEchip safety circuit

Driver's licence class B

<b>─</b> Wood diameters of up to	16 cm
Feed width	240 mm
<b>Weight</b>	< 750 kg
Feed hopper	865 x 720 mm

schliesing wood chippers comply with the safety regulations of DIN EN 13525. The diesel engines installed exceed the exhaust emission standards of EU 97/68 / III A

- Proven schliesing quality, yet with a weight of less than 750 kg
- Suitable for driver's licence class B holders no trailer licence required
- Small, lightweight, highly maneuverable and powerful for chipping wood diameters of up to 16 cm

#### **ENGINE AND CHASSIS**

- 3-cylinder Kubota diesel engine with 16.1 kW (22 hp)
- Water-cooled
- Industrial freewheel clutch, automatically engaging between the engine and the chipping disk
- Power Control System incl. minutes counter (optional)
- Fully galvanized, corrosion-resistant single-axle chassis (80 km/h) also available for 100 km/h
- Towing hitch with inertia brake and ball coupling
- Front jockey wheel and support leg at the rear
- Road lights in accordance with StVZO (shock-protected)
- TUEV expertise and ABE (general operation approval D, NL, F)
- Pneumatic tires 165/70 R13

#### MACHINE BODY / FEED HOPPER / DISCHARGE CHUTE

- Pivoting discharge chute with adjustable chip deflector (as per GS standard)
- Many components in exposed positions galvanized
- Sound insulation of relevant machine parts (hood in particular)
- Feed hopper with flap as per CE standards, 1,500 mm feeding
- Change of colour optional

#### **CHIPPER UNIT**

- Infinitely variable, hydraulic chip size adjustment (5 25 mm)
- 2-blade chipping disk with continuously adjustable blades that can be re-sharpened multiple times for a high service life
- Enclosed cutting system for a quick, safe and exact blade change
- Horizontal anvils and vertical blades can be used twice each resulting in a long service life
- Excellent protection against entangling at the main bearing of the chipping disk
- Chipping unit equipped with safety circuit conforming to EN 13525

- Separate hydraulic circuit
- PowerGrip feed rollers with hydraulic forced feeding and two separate oil motors for an aggressive yet uniform feeding of material while preventing the wood from lashing out to the left and right
- Parallel-guided upper feed roller providing a uniform feeding (no wedging of the fed material)
- Optional: SAFEchip safety circuit

Sturdy and built to last!

	16 cm
Feed width	240 mm
<b>Weight</b>	ca. 1,050 kg
Feed hopper	950 x 825 mm

schliesing wood chippers comply with the safety regulations of DIN EN 13525. The diesel engines installed exceed the exhaust emission standards of EU 97/68 / III A

- schliesing quality for the most demanding jobs in wood diameters of up to 16 cm
- WhisperCut® option: low-noise and reduced operating costs
- Many further options available

#### ENGINE AND CHASSIS

- 3-cylinder Kubota diesel engine with 18.5 kW (25 hp)
- Water-cooled
- Industrial freewheel clutch automatically acting between the engine and the disk
- Power Control System incl. minutes counter (optional)
- Fully galvanized, corrosion-resistant single-axle chassis (80 km/h) – optionally available in a 100 km/h version
- Fixed, walk-on fenders made of sheet steel
- Towing hitch with inertia brake and ball-shaped coupling or DIN eye coupling (optional: towing hitch adjustable in height)
- Front jockey wheel and support leg at the rear
- Optional: hydraulic wheel drive
- Road lights in accordance with StVZO (shock-protected)
- TUEV expertise and ABE (general operation approval D, NL, F)
- Pneumatic tires 185/70 R13

#### MACHINE BODY / FEED HOPPER / DISCHARGE CHUTE

- Turning discharge chute on ball bearing flange with adjustable deflector (as per GS standard)
- Many components in exposed positions galvanized
- Sound insulation of relevant machine parts (hood in particular)
- Feed hopper with flap as per CE standards, 1,500 mm feeding
- Change of colour optional
- Choice of two discharge chute lengths optionally adaptable

#### **CHIPPER UNIT**

- Infinitely variable setting of the chip size (5 - 25 mm)
- 2-blade chipping disk with continuously adjustable blades that can be re-sharpened multiple times for a high service life
- Enclosed cutting system for a quick, safe and exact blade change
- Horizontal anvils and vertical blades can be used twice each resulting in a long service life
- Excellent protection against entangling at the main bearing of the chipping disk
- Chipping unit equipped with safety circuit conforming to EN 13525

#### MACHINE BODY / FEED HOPPER / DISCHARGE CHUTE

- Separate hydraulic circuit
- PowerGrip feed rollers with hydraulic forced feeding and two separate oil motors for an aggressive and uniform feeding of material, while preventing branches from lashing out to the left and right
- Parallel-guided upper feed roller for a uniform and continuous feeding of material (no wedging of the material)
- Optional: SAFEchip safety circuit

	o 19 cm
Feed width	240 mm
<b>Weight</b>	ca. 1,250 kg
Feed hopper	1,020 x 940 mm
Currently more than 1 000 m	achines in use

schliesing wood chippers comply with the safety regulations of DIN EN 13525. The diesel engines installed exceed the exhaust emission standards of EU 97/68 / III A

- Third generation of this model
- Professionally used for more than 20 years
- Universal, durable, reliable and optimised for maintenance
- WhisperCut® option: low-noise with reduced operating costs
- Many further options available

#### **ENGINE AND CHASSIS**

- 4-cylinder Kubota diesel engine with 25.7 kW (35 hp) optimised for ease of maintenance thanks to its accessibility
- Water-cooled
- Industrial freewheel clutch automatically acting between the engine and the disk
- Power Control System incl. minutes counter (optional)
- Fully galvanized, corrosion-resistant single-axle chassis
   (80 km/h) optionally available in a 100 km/h version
- Towing hitch with inertia brake and ball-shaped coupling or DIN eye coupling (optional: towing hitch adjustable in height)
- Optional: hydraulic wheel drive
- Front jockey wheel and support leg at the rear
- Road lights in accordance with StVZO (shock-protected)
- TUEV expertise and ABE (general operation approval D, NL, F)
- Pneumatic tires 205/65 R15

#### MACHINE BODY / FEED HOPPER / DISCHARGE CHUTE

- Turning discharge chute on ball bearing flange with adjustable deflector (as per GS standard)
- Many components in exposed positions galvanized
- Sound insulation of relevant machine parts (hood in particular)
- Feed hopper with flap as per CE standards, 1,500 mm feeding depth
- Change of colour optional
- Choice of two discharge chute lengths optionally adaptable

#### **CHIPPER UNIT**

- Infinitely variable setting of the chip size (5 25 mm)
- 2-blade chipping disk with continuously adjustable blades that can be resharpened multiple times for a high service life
- Enclosed cutting system for a quick, safe and exact blade change
- Horizontal anvils and vertical blades can be used twice each resulting in a long service life
- Excellent protection against entangling at the main bearing of the chipping disk
- Chipping unit equipped with safety circuit conforming to EN 13525

- Separate hydraulic circuit
- PowerGrip feed rollers with hydraulic forced feeding and two separate oil motors for an aggressive and uniform feeding of material, while preventing branches from lashing out to the left and right
- Parallel-guided upper feed roller for a uniform and continuous feeding of material (no wedging of the material)
- Oil level indicator for hydraulic oil tank
- Optional: SAFEchip safety circuit

	o 19 cm
Feed width	240 mm
<b>Weight</b>	ca. 1,300 kg
Feed hopper	1,020 x 940 mm

"The big brother" of our 235 MX

schliesing wood chippers comply with the safety regulations of DIN EN 13525. The diesel engines installed exceed the exhaust emission standards of EU 97/68 / III A

- More powerful version of the 235 MX with increased engine power for even more efficient chipping.
- Incl. broader tires, wider axle and fenders for increased comfort and driving safety
- WhisperCut® option: low-noise with reduced operating costs
- Many further options available

#### **ENGINE AND CHASSIS**

- 4-cylinder Kubota turbo diesel engine with 33.0 kW (45 hp) optimised for ease of maintenance thanks to its accessibility
- Water-cooled
- Industrial freewheel clutch automatically acting between the engine and the disk
- Power Control System incl. minutes counter (optional)
- Fully galvanized, corrosion-resistant single-axle chassis
   (80 km/h) optionally available in a 100 km/h version
- Fixed, broadened walk-on fenders made of sheet steel
- Towing hitch with inertia brake and ball-shaped coupling or DIN eye coupling (optional: towing hitch adjustable in height)
- Optional: hydraulic wheel drive
- Front jockey wheel and support leg at the rear
- Road lights in accordance with StVZO (shock-protected)
- TUEV expertise and ABE (general operation approval D, NL, F)
- Wide-base tires 215/65 R16C

#### MACHINE BODY / FEED HOPPER / DISCHARGE CHUTE

- Turning discharge chute on ball bearing flange with adjustable deflector (as per GS standard)
- Many components in exposed positions galvanized
- Sound insulation of relevant machine parts (hood in particular)
- Feed hopper with flap as per CE standards, 1,500 mm feeding depth
- Change of colour optional
- Choice of two discharge chute lengths optionally adaptable

#### **CHIPPER UNIT**

- Infinitely variable setting of the chip size (5 25 mm)
- 2-blade chipping disk with continuously adjustable blades that can be resharpened multiple times for a high service life
- Enclosed cutting system for a quick, safe and exact blade change
- Horizontal anvils and vertical blades can be used twice each resulting in a long service life
- Excellent protection against entangling at the main bearing of the chipping disk
- Chipping unit equipped with safety circuit conforming to EN 13525

- Separate hydraulic circuit
- PowerGrip feed rollers with hydraulic forced feeding and two separate oil motors for an aggressive and uniform feeding of material, while preventing branches from lashing out to the left and right
- Parallel-guided upper feed roller for a uniform and continuous feeding of material (no wedging of the material)
- Oil level indicator for hydraulic oil tank
- Optional: SAFEchip safety circuit

## 235 / 300 EX

	19 cm
Feed width	240 mm

<b>Standard</b>	weight	ca. 1,350 kg

← Feed hopper	1,020 x 940 mm
---------------	----------------

Turning chipper unit 270°!

schliesing wood chippers comply with the safety regulations of DIN EN 13525. The diesel engines installed exceed the exhaust emission standards of EU 97/68 / III A

- Compact, powerful and efficient now available with a 270° turning chipper unit as well!
- Our proof of quality and development skills
- User-oriented, easy to service and maintain, reliable
- WhisperCut® option: low-noise with reduced operating costs
- Many further options available

#### **ENGINE AND CHASSIS**

- Water-cooled 4-cyl. Kubota diesel engine of 25.7 kW / 35 hp (235 EX) or 33 kW / 45 hp turbodiesel engine (300 EX)
- Industrial freewheel clutch automatically acting between the engine and the disk
- Power Control System incl. minutes counter (optional)
- Fully galvanized, corrosion-resistant single-axle chassis (80 km/h) optionally available in a 100 km/h version
- Fixed, walk-on fenders made of sheet steel
- Chipper unit turning 270 degrees
- Towing hitch with inertia brake and ball-type coupling or DIN eye coupling
- Front jockey wheel and support leg at the rear Walk-on
- Optional: hydraulic wheel drive (EX)
- Road lights in accordance with StVZO (shock-protected)
- TUEV expertise and ABE (general operation approval D, NL, F)
- Wide-base tires 195/70 R14 96N

#### MACHINE BODY / FEED HOPPER / DISCHARGE CHUTE

- Turning discharge chute on ball bearing flange with adjustable deflector (as per GS standard)
- Many components in exposed positions galvanized
- Sound insulation of relevant machine parts (hood in particular)
- Feed hopper with flap as per CE standards, 1,500 mm feeding depth
- Change of colour optional
- Choice of two discharge chute lengths optionally adaptable

#### **CHIPPER UNIT**

- Infinitely variable setting of the chip size (5 25 mm)
- 2-blade chipping disk with continuously adjustable blades that can be resharpened multiple times for a high service life
- Enclosed cutting system for a quick, safe and exact blade change
- Horizontal anvil and vertical blade turning 4 times each resulting in a long service life
- Excellent protection against entangling at the main bearing of the chipping disk
- Chipping unit equipped with safety circuit conforming to EN 13525
- Optional: special equipment for long-fibre wood (e. g. palm trees)

- Separate hydraulic circuit
- PowerGrip feed rollers with hydraulic forced feeding and two separate oil motors for an aggressive and uniform feeding of material, while preventing branches from lashing out to the left and right
- Parallel-guided upper feed roller for a uniform and continuous feeding of material (no wedging of the material)
- Oil level indicator for hydraulic oil tank
- Optional: SAFEchip safety circuit

## 355 **EX/TX**

	o to 22 cm
Feed width	300 mm
<b>Weight</b>	ca. 1.830 kg (EX)
<b>Weight</b>	ca. 1.950 kg (TX)
Feed hopper	1.170 x 1.035 mm
Middle-class economy model	

schliesing wood chippers comply with the safety regulations of DIN EN 13525. The diesel engines installed exceed the exhaust emission standards of EU 97/68 / III A

- Water-cooled Kubota diesel engine of the latest generation: sustainable, low-emission, smooth and powerful
- Single-axle chassis (EX) or, optionally, with a tandem axle (TX)
- Chipper unit standard turning 270 degrees
- WhisperCut® option: low-noise with reduced operating costs

#### ENGINE AND CHASSIS

- 4-cylinder Kubota diesel engine with 36.5 kW (50 hp)
- Water-cooled
- Industrial freewheel clutch automatically acting between the engine and the disk
- Power Control System incl. minutes counter (optional)
- Fully galvanized, corrosion-resistant (80 km/h) single-axle (EX) or tandem-axle chassis (TX)
- Fixed, walk-on fenders made of sheet steel
- Chipper unit turning 270 degrees
- Towing hitch with inertia brake, adjustable in height (ball coupling or DIN eye coupling)
- Optional: hydraulic wheel drive (EX)
- Road lights in accordance with StVZO (shock-protected)
- TUEV expertise and ABE (general operation approval D, NL, F)
- Pneumatic tires 205 R14C (EX) or 185/70 R14 (TX)

#### MACHINE BODY / FEED HOPPER / DISCHARGE CHUTE

- Turning discharge chute on ball bearing flange with adjustable deflector (as per GS standard)
- Many components in exposed positions galvanized
- Sound insulation of relevant machine parts (hood in particular)
- Feed hopper with flap as per CE standards, 1,500 mm feeding depth
- Change of colour optional
- Choice of two discharge chute lengths optionally adaptable

#### **CHIPPER UNIT**

- Infinitely variable setting of the chip size (5 25 mm)
- 2-blade chipping disk with continuously adjustable blades that
- can be resharpened multiple times for a high service life
- Enclosed-cutting system for a quick, safe and exact blade change
- Horizontal anvil and vertical blade turning 4 times each resulting in a long service life
- Excellent protection against entangling at the main bearing of the chipping disk
- Chipping unit equipped with safety circuit conforming to EN 13525
- Optional: special equipment for long-fibre wood (e.g. palm trees)

- Separate hydraulic circuit
- PowerGrip feed rollers with hydraulic forced feeding and two separate oil motors for an aggressive and uniform feeding of material, while preventing branches from lashing out to the left and right
- Parallel-guided upper feed roller for a uniform and continuous feeding of material (no wedging of the material)
- Oil level indicator for hydraulic oil tank
- Optional: SAFEchip safety circuit

## **465 EX/TX**

	to 23 cm
Feed width	300 mm
<b>Weight</b>	ca. 1,900 kg (EX)
<b>Weight</b>	ca. 1,950 kg (TX)
Feed hopper	1,170 x 1,035 mm

Middle class model with increased engine power

schliesing wood chippers comply with the safety regulations of DIN EN 13525. The diesel engines installed exceed the exhaust emission standards of EU 97/68 / III A

- Strong, water-cooled Kubota turbo diesel engine of the latest generation with 66 hp: sustainable, low-emission, smooth and powerful
- Single-axle chassis (EX) with reinforced axle or, optionally, with a tandem axle (TX)
- Chipper unit standard turning 270 degrees
- WhisperCut® option: low-noise with reduced operating costs

#### **ENGINE AND CHASSIS**

- 4-cylinder Kubota turbo diesel engine with 49.2 kW (66 hp)
- Water-cooled
- Industrial freewheel clutch automatically acting between the engine and the disk
- Power Control System incl. minutes counter (optional)
- Fully galvanized, corrosion-resistant (80 km/h) single-axle (EX) or tandem-axle chassis (TX)
- Fixed, walk-on fenders made of sheet steel
- Chipper unit turning 270 degrees
- Towing hitch with inertia brake, adjustable in height (ball coupling or DIN eye coupling)
- Optional: hydraulic wheel drive (EX)
- Road lights in accordance with StVZO (shock-protected)
- TUEV expertise and ABE (general operation approval D, NL, F)
- Heavy-duty tires 205/65 R17.5 (EX) or 185/70 R14 (TX)

#### MACHINE BODY / FEED HOPPER / DISCHARGE CHUTE

- Turning discharge chute on ball bearing flange with adjustable deflector (as per GS standard)
- Many components in exposed positions galvanized
- Sound insulation of relevant machine parts (hood in particular)
- Feed hopper with flap as per CE standards, 1,500 mm feeding depth
- Change of colour optional
- Choice of two discharge chute lengths optionally adaptable

#### **CHIPPER UNIT**

- Infinitely variable setting of the chip size (5 25 mm)
- 2-blade chipping disk with continuously adjustable blades that can be resharpened multiple times for a high service life
- Enclosed cutting system for a quick, safe and exact blade change
- Horizontal anvil and vertical blade turning 4 times each resulting in a long service life
- Excellent protection against entangling at the main bearing of the chipping disk
- Chipping unit equipped with safety circuit conforming to EN 13525
- Optional: special equipment for long-fibre wood (e. g. palm trees)

- Separate hydraulic circuit
- PowerGrip feed rollers with hydraulic forced feeding and two separate oil motors for an aggressive and uniform feeding of material, while preventing branches from lashing out to the left and right
- Parallel-guided upper feed roller for a uniform and continuous feeding of material (no wedging of the material)
- Oil level indicator for hydraulic oil tank
- Optional: SAFEchip safety circuit

## 485 EX/TX

	p to 24 cm
Feed width	300 mm
<b>Weight</b>	ca. 1,950 kg (EX)
<b>Weight</b>	ca. 2,000 kg (TX)
Feed hopper	1,170 x 1,035 mm
Middle class model for highest performance	

schliesing wood chippers comply with the safety regulations of DIN EN 13525. The diesel engines installed exceed the exhaust emission standards of EU 97/68 / III A

- Strong, water-cooled Kubota turbo diesel engine of the latest generation with 75 hp: sustainable, low-emission, smooth and powerful
- Single-axle chassis (EX) with reinforced axle or, optionally, with a tandem axle (TX)
- Chipper unit standard turning 270 degrees
- WhisperCut® option: low-noise with reduced operating costs

#### **ENGINE AND CHASSIS**

- 4-cylinder Kubota turbo diesel engine with 55.4 kW (75 hp)
- Water-cooled
- Industrial freewheel clutch automatically acting between the engine and the disk
- Power Control System incl. minutes counter (optional)
- Fully galvanized, corrosion-resistant (80 km/h) single-axle (EX) or tandem-axle chassis (TX)
- Fixed, walk-on fenders made of sheet steel
- Chipper unit turning 270 degrees
- Towing hitch with inertia brake, adjustable in height (ball coupling or DIN eye coupling)
- Optional: hydraulic wheel drive (EX)
- Road lights in accordance with StVZO (shock-protected)
- TUEV expertise and ABE (general operation approval D, NL, F)

#### MACHINE BODY / FEED HOPPER / DISCHARGE CHUTE

- Turning discharge chute on ball bearing flange with adjustable deflector (as per GS standard)
- Many components in exposed positions galvanized
- Sound insulation of relevant machine parts (hood in particular)
- Feed hopper with flap as per CE standards, 1,500 mm feeding depth
- Change of colour optional
- Choice of two discharge chute lengths optionally adaptable

#### **CHIPPER UNIT**

- Infinitely variable setting of the chip size (5 25 mm)
- 2-blade chipping disk with continuously adjustable blades that can be resharpened multiple times for a high service life
- Enclosed cutting system for a quick, safe and exact blade change
- Horizontal anvil and vertical blade turning 4 times each resulting in a long service life
- Excellent protection against entangling at the main bearing of the chipping disk
- Chipping unit equipped with safety circuit conforming to EN 13525
- Optional: special equipment for long-fibre wood (e. g. palm trees)

- Separate hydraulic circuit
- PowerGrip feed rollers with hydraulic forced feeding and two separate oil motors for an aggressive and uniform feeding of material, while preventing branches from lashing out to the left and right
- Parallel-guided upper feed roller for a uniform and continuous feeding of material (no wedging of the material)
- Oil level indicator for hydraulic oil tank
- Optional: SAFEchip safety circuit

Wood diameters of up to 30 cm

Feed width 340 mm

Weight ca. 3,200 kg

Feed hopper 1,420 x 960 mm

Ideally suited for wood chip production on a greater scale

schliesing wood chippers comply with the safety regulations of DIN EN 13525. The diesel engines installed exceed the exhaust emission standards of EU 97/68 / III A

- Water-cooled Kubota turbo diesel engine of the latest generation with 100 hp and 3-blade chipping disk for maximum performance
- Easily processes wood quantities of up to 25 m³/h
- Available with radio remote control requiring one operator only (e.g. incl. crane functions)
- Top feed roller with auxiliary transmission to increase the feeding force (by up to 400%)
- Pneumatic brake and many other features optionally available

#### **ENGINE AND CHASSIS**

- 4-cylinder Kubota turbo diesel engine with 74.0 kW (100 hp)
- Water-cooled
- Hydraulic Turbomatic clutch, automatically acting between the engine and the disk
- Power Control System incl. minutes counter (optional)
- Fully galvanized, corrosion-resistant tandem-axle chassis (80 km/h)
- Fixed, walk-on fenders made of sheet steel
- Chipper unit turning 270 degrees
- Towing hitch with inertia brake, adjustable in height (ball coupling or DIN eye coupling)
- Road lights in accordance with StVZO (shock-protected)
- TUEV expertise and ABE (general operation approval D, NL, F)
- Heavy-duty tires 205/65 R17.5

#### MACHINE BODY / FEED HOPPER / DISCHARGE CHUTE

- Turning discharge chute on ball bearing flange with adjustable deflector (as per GS standard)
- Many components in exposed positions galvanized
- Sound insulation of relevant machine parts (hood in particular)
- Feed hopper with flap as per CE standards, 1,500 mm feeding depth
- Change of colour optional
- Choice of two discharge chute lengths optionally adaptable

#### **CHIPPER UNIT**

- Infinitely variable setting of the chip size (5 25 mm)
- 3-blade chipping disk with fully adjustable blades that can be resharpened multiple times for a high service life
- Enclosed cutting system for a quick, safe and exact blade change
- Horizontal anvils and vertical blades can be used four times for a high service life
- Excellent protection against entangling at the main bearing of the chipping disk
- Chipping unit equipped with safety circuit conforming to EN 13525

- Separate hydraulic circuit
- PowerGrip feed rollers with hydraulic forced feeding and two separate oil motors for an aggressive and uniform feeding of material, while preventing branches from lashing out to the left and right
- Auxiliary transmission to increase the feeding force (by up to 400%)
- Parallel-guided upper feed roller for a uniform and continuous feeding of material (no wedging of the material)
- Oil level indicator for hydraulic oil tank
- Optional: SAFEchip safety circuit

## WhisperCut®

- Internationally patented cutting system registered as a brand
- Established and proven on the market for more than 15 years
- V-shaped blade positions ensure a more uniform feeding of the material towards the centre with fewer vibrations. No lashing out of the wood – increased work safety
- Noise level reduction of up to 30%
- Service life of the blades increased by up to 40% and wider spaced service intervals result in low operating costs
- Optionally available for nearly all schliesing wood chipper models

V-shaped blade positions for noise level reduction, a more uniform feeding of the material and the reduction of operating costs

Available for nearly all wood chipper models of the schliesing product ranges engine-driven, PTO-driven and special machines

# SAFEchip safety technology

#### Recommended by the Gardening Employer's Liability Insurance Association

- Electro-sensitive protection system through an electromagnetic field
- The sender (transponder) is carried inside the ear protection
- If approached to closely, the feed rollers will automatically stop, thus preventing accidents
- Proven in everyday use and judged positively by the operators
- Seamlessly fits into the work flow
- Quick-test unit for the battery status included in the delivery

When entering the electromagnetic field generated by the sending/receiving unit, the feed rollers are instantly stopped

## Hydraulic wheel drive

## Maneuvering the machine without a pulling vehicle

- Allows for moving the machine without a pulling vehicle
- To manoeuvre in constrained surroundings or areas with difficult access
- Driven by a separate hydraulic system (consisting of two hydraulic oil motors and friction rollers, as well as a controller unit)
- Operated by two control valves mounted on the machine (functions: forward, backward and turn)

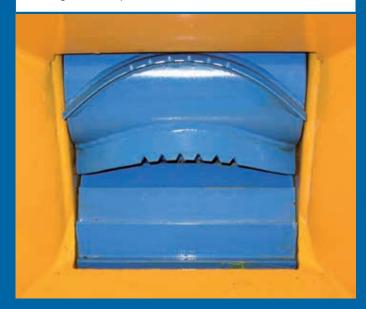

Friction roller drive at two wheels

Hydraulic control valves

## Hydraulic PowerGrip feed rollers

- PowerGrip feed rollers with curved steel cotters
- Secure seizing of largediameter wood and crushing of crutches
- The hydraulic forced feeding with two separate oil motors (one per feed roller) warrants an aggressive and uniform feeding operation
- This system prevents branches from lashing out to left and right: increased work safety
- Parallel guidance of the upper feed roller: prevents a jamming of the fed material and minimizes wear and tear of the drive shafts
- Model 550 MX is standard equipped with a torque multiplication transmission at the upper feed roller: increase of the feeding force of up to 400%

## Overview

	105MX	175 MX	200MX	235MX
CORE DATA				
Wood diameters of up to	13 cm	16 cm	16 cm	19 cm
Feed width	200 mm	240 mm	240 mm	240 mm
Feed hopper dimensions: width x height (mm)	865 x 720	865 x 720	950 x 825	1.020 x 940
Chipping disk: diameter x thickness (mm)	600 x 25	660 x 30	660 x 30	660 x 35
Weight (basic machine)	< 750 kg	< 750 kg	ca. 1,050 kg	ca. 1,250 kg
ENGINE				
Manufacturer	Kubota	Kubota	Kubota	Kubota
Model	3-cyl., diesel	3-cyl., diesel	3-cyl., diesel	4-cyl., diesel
Engine power	14,7 kW (20 hp)	16,1 kW (22 hp)	18,5 kW (25 hp)	25,7 kW (35 hp)
Water-cooled engine				
Industrial freewheel clutch	•	•	•	•
Hydraulic Turbomatic clutch  Power Control (electric overload protection) incl. minutes counter	0	0	0	0
rower control (electric overload protection) incl. minutes counter	· ·	· ·	Ŭ	· ·
CHASSIS				
Galvanized single-axle chassis (80 km/h) EX	-	•	•	•
Single-axle chassis for 100 km/h	0	0	0	0
Hydraulic wheel drive for single-axle models EX	_	_	0	0
Galvanized tandem-axle chassis (80 km/h) TX	<del>-</del>	<del>-</del>	<del>-</del>	_
Towing hitch with inertia brake / adjustable in height	■ / —	■ / —	■/○	■/○
Theft protection towing hitch	0	0	0	0
Heavy-duty front jockey wheel				
Rear supporting leg for single-axle models EX				
Spare tire with mounting	0		0	0
Road lights in accordance with StVZO (shock-protected)	■/-	■ / —	■ / —	■/-
TUV expertise and ABE (general operation license - D, NL and F)	•	•	•	•
Driver's license class B sufficient	•	•	-	_
FEED HOPPER/HOUSING				
Chipping unit turning 270°	_	-	-	-
Feed hopper with flap in conformity with CE standards				
Turning discharge chute as per EN				
Adjustable deflector on discharge chute				•
Discharge chute on ball bearing flange	_	-	•	•
Sound insulation				•
Exposed machine parts galvanized	-			•
CHIDDED HAIT				
CHIPPER UNIT PowerGrip feed rollers	_			
Parallel-guided upper feed roller		- :	- :	-
Auxiliary transmission on upper feed roller for increased power	_	_	<u>-</u>	<u>-</u>
Enclosed blade system				
2-blade chipping disk	-	-	-	-
3-blade chipping disk	_	_	_	_
WhisperCut® V-blade system	_	_	0	0
Infinitely variable adjustment of the chip length (5 – 25 mm)				
Anvils can be used multiple times (horizontally/vertically)	-	-	-	-
Protection against entangling at the chipping disk	-	-	-	
Safety circuit as per EN 13525	•	•	•	•
SAFEchip safety circuit	0	0	0	0
HYDRAULICS		_		_
Separate hydraulic circuit				
Feed roller with hydraulic forced feeding		•	•	
Separate oil motor for each feed roller	-	-	-	
Hydraulic chip size adjustment	•	•	•	
Oil level indicator for hydraulic tank  Hydraulic wheel drive for single-axle models EX	_	<u>-</u>	- 0	•
Hydraulic wheel drive for single-axle models EX

## Contact

#### **SPARE PARTS**

For spare parts' shipment on the same day you may reach us by phone:

Tel. + 49 (0) 2152 9140 - 35

Mo - Th 8 am - 2 pm, Fr 8 am - 11 am

Apart from these times you can reach us by fax and email:

Fax + 49 (0) 2152 9140 - 51

Email ersatzteile@schliesing.com

#### **SERVICE**

Tel. + 49 (0) 2152 9140 - 63

Fax + 49 (0) 2152 9140 - 51

#### **SALES**

#### Germany

Tel. + 49 (0) 2152 9140 - 34

Fax + 49 (0) 2152 9140 - 70

#### International

Tel. + 49 (0) 2152 9140 -11

Fax + 49 (0) 2152 9140 - 70
