

RECYCLING BINS STREET FURNITURE

COMPANY PROFILE

R&D Management System certified by AENOR

CERVIC ENVIRONMENT is part of the family-owned company CERVIC, S.A.® with **50** years of history. The national leader in Spain with presence in more than **37** countries worldwide.

Specializing in recycling bins and street furniture, Cervic Environment offer solutions characterized by their excellent functionality and reliability, combined with aesthetics that decorate and fit perfectly in the environment. Our products have successfully passed functional and resistance tests under real conditions of use to guarantee their reliability and performance.

Certified by AENOR under the standard UNE 166.002 concerning innovation and development management, our department of engineering and design have received several awards from national and international organizations.

The hallmark and the strength of Cervic Environment is, without a doubt, our capacity and flexibility to **develop** custom products by adapting our own products or creating an entirely bespoke design to suit the customer's particular needs.

Each of our steps is aligned with the commitment to a **sustainable business project**, which supports a **circular economy business model**, and is characterized by using resources in a sustainable way and **Ecodesign**: developing environmentally friendly products that incorporate **recycled materials**, with a **very significant durability**, and **100% recyclable** at the end of its useful life.

From our manufacturing facilities in Spain, we design, produce and supply our products around the world.

LOOKS SMART, WORKS BETTER

- At Cervic Environment, "design is more than the look of a product, design is above all how the product works".
- Our quality designs, with great functionality and reability lead us to have very loyal customers.

CERTIFIED SELF-EXTINGUISHING BINS

Cervic environment has one of the most extensive range of Self-Extinguishing bins.

Cervic Self-extinguishing bins, due to their specific configuration & design, keep the fire inside the bin (avoiding the fire to come out and spread). Additionally the Self-extinguishing bins turn off the flames in the inside by themselves, extinguishing the fire this way.

Specially suitable for public buildings and facilities such as airports, subway stations, train stations, schools, universities, etc.

Certified by the Fire Lab Institute. All the bins have passed the test and have obtained the Self-Extinguishing Certificate according to the standards of DIN 31000:2011 and DIN EN ISO 13857:2008.

Check the available bins with a self-extinguishing system in our catalogue. They can be identified by this stamp:

MALLORCA

Wooden recycling cabinet designed for food areas with a large number of users.

For 5 residues. It allows collecting both solid and liquid waste.

The version with liquid waste has a compartment to store cleaning materials.

Optional: Additional informative board.

Colors Wooden Metal

doors

Easy emptying by means of a frontal door

Collecting system: inner ring with an elastic band to hold the bag in place which can be horizontally fold out by guides or metal inner liner with elastic band to keep the bag in place. Cabinet made of MDF wood and the rest of the components made of galvanized steel. Check page 112 for specifications.

MUNICH

Very robust and stylized bin with an excellent value for money.

Collection system: smart inner-ring or metal inner-liner with elastic band bag holder. Separated inner compartments for each type of waste.

Made of galvanized steel or stainless steel.

Available for 2, 3 or 4 types of waste.

MUNICH Self-Closing Flaps & Self-Extinguishing

The waste is hidden in the version with self-closing flaps.

The version with a self-extinguishing certificate has open streams.

Collection system: smart inner-ring or metal inner-liner with elastic band bag holder. Separated inner compartments for each type of waste.

Made of galvanized steel or stainless steel.

DUBLIN

OUTDOOR

Triangular multiwaste bin with an excellent value for money. Available for 2 or 3 types of waste. An ashtray or batteries holder comes as standard.

Collection system: metal inner liner with elastic band bag holder.

Made of galvanized steel or stainless steel.

Extremely robust bin with front door system and large capacity.

Suitable to be used individually or creating recycling stations.

Available in three capacities and with multiple types of lids.

Certificate of Self-Extinguishing bin for the version with self-closing flaps.

Collection system: sliding smart inner-ring or metal inner-liner with elastic band bag holder. Free standing bin, also suitable to be mounted on walls..

Made of galvanized steel.

STOCKHOLM

Bin with front door system which can be used individually or forming recycling stations. Available with multiple types of lids.

Self-Extinguishing certified.

Collection system: sliding smart inner-ring or metal inner-liner with elastic band bag holder. Suitable for mounting on walls.

Made of galvanized steel.

STOCKHOLM XL

Large capacity bin with front door system which can be used individually or forming recycling stations.

Self-Extinguishing certified.

Available with two side openings with self-closing flaps (back and front side). Collection system: metal inner liner with elastic band bag holder.

Made of galvanized steel.

NICE

Color

Suitable to be used individually or creating recycling stations.

Available in four capacities and with multiple types of lids.

Certificate of Self-Extinguishing bin for the version with swing lid and smooth body. Collection system: smart inner-ring or metal inner-liner with elastic band bag holder. Compatible with Nice Multi-Waste.

 $\label{eq:made_of_galvanized} \mbox{Made of galvanized steel or stainless steel}.$

NICE Multi

Color

Compact multi-waste bin for 2 or 3 types of waste which can be used individually or forming recycling stations.

Available in two capacities and with open lid or soft closing cover.

Collection system: smart inner-ring with elastic band bag holder.

Compatible with Nice.

Made of galvanized steel or stainless steel.

MADRID

Color

Circular multiwaste bin with lock

Available in 120 liters or 180 liters for 2, 3 and 4 types of waste.

Collection system: smart inner-ring or metal inner-liner with elastic band bag holder.

Separated inner compartments for each type of waste.

The waste is hidden in the version with soft closing cover.

Made of galvanized steel or stainless steel (120 litres version).

MADRID Security

Circular multiwaste bin with body partly made of transparent polycarbonate. Available for 2, 3 and 4 types of waste.

Collection system: smart inner-ring bag holder.

Separated inner compartments for each type of waste.

Made of galvanized steel.

BRUSSELS

Attractive two waste bin.

Separated compartments for each waste.

Available with different types of sorting slots.

Collection system: metal inner liner with elastic band bag holder.

Made of galvanized steel.

Formed by curved and straight modules that can be connected to each other. Available in 3 versions:

- 1) Recycled plastic (mixed version made of metal and recycled plastic-Recyplast)***
- 2) WPC-Composite wood (mixed version made of metal and ecological composite wood).***
- 3) Wood (mixed version made of metal and tropical wood).
- *** Ecological versions. Do not require maintenance. Especially recommended for promenades, coastal areas or places with high exposure to saline corrosion.

Accessories: backrests and armrests.

MALAGA Chaise longue

Available in 3 versions:

- 1) Recycled plastic (mixed version made of metal and recycled plastic-Recyplast)***
- 2) WPC-Composite wood (mixed version made of metal and ecological composite wood). ***
- 3) Wood (mixed version made of metal and tropical wood).
- *** Ecological versions. Do not require maintenance. Especially recommended for promenades, coastal areas or places with high exposure to saline corrosion.

Can be fixed to the ground or used without anchoring "free-standing".

Support structure made galvanized and pickled steel with anticorrosive primer.

ECOTEC Bench

Optional: version with USB charger available.

Resistant to extreme weather conditions. Multicolor and Anti-graffiti.

They do not require maintenance.

Ecological boards as they come from recycled materials and are 100% recyclable at the end of their shelf life.

Legs and structure made of steel tube with anti-corrosion treatment.

Slats made of recycled technical polymer.

VALENCIA Bench

Modular bench. Can be installed individually or combining several models forming large seating spaces. Available with backrest, half backrest and backless.

Available in 3 versions:

- 1) Recycled plastic (mixed version made of metal and recycled plastic-Replast)***
- 2) WPC-Composite wood (mixed version made of metal and ecological composite wood).***
- 3) Wood (mixed version made of metal and tropical wood).
- *** Ecological versions. Do not require maintenance. Especially recommended for promenades, coastal areas or places with high exposure to saline corrosion.

Can be fixed to the ground.

Legs are made of steel with zinc rich primer and boards of tropical wood and RePlast.

VANCOUVER Bench

boards

Tropical wood

Bench, backless bench and chair.

Optional: version with USB charger available.

Available in 3 versions:

- 1) Recycled plastic (mixed version made of metal and recycled plastic-Replast)***
- 2) WPC-Composite wood (mixed version made of metal and ecological composite wood).***
- 3) Wood (mixed version made of metal and tropical wood).
- *** Ecological versions. Do not require maintenance. Especially recommended for promenades, coastal areas or places with high exposure to saline corrosion.

Legs and structure made of steel tube with anti-corrosion treatment.

IBIZA Bench

Colors

structure

Stylized and very robust bench made of steel (reinforced) and with technical polymer panel on the seating area.

Available two versions: full backrest or half backrest.

Suitable for indoor and outdoor use.

Can be fixed to the ground.

Made of steel with special anti-corrosion treatment and technical polymer panel on the seating area.

PLANTERS street furniture

- 91 Osaka
- 92 Malaga
- **93** Valencia

OSAKA Planter

Available with different capacities and shapes:
- Square high: 530 L.

- Square high: 530 L. - Square low: 240 L. - Rhombus high: 450 L. - Rhombus low: 220 L.
- Anchorable to the ground. It incorporates articulated and height-adjustable legs. Made of galvanized steel.

Available in square and rectangular shapes. Four options with different capacities and heights are available.

Metal inner-liner suitable for easy removal.

Drainage holes in the base.

Adjustable legs are incorporated.

Can be fixed to the ground.

Made of galvanized steel.

MALAGA Planter

Colors corten effect

Cylindrical planter, available in different diameters and heights.
